

ACCESSIBILITY

BEST PRACTICES

Captions and Transcripts

- Include captions for all videos containing sound
- Use the live transcript feature in virtual meetings
- Provide a transcript for audio recordings

Descriptive Links

- Avoid displaying the full URL
- Avoid hyperlinking the words "click here" or "here"
- Instead, provide a description of where the link will take you (for example: Visit the [PHP website](#) for training information!)

Alternative (Alt) Text

- Provide a text-based equivalent of an image; think about what the image is trying to convey
- Keep it short and to the point
- For graphs, flowcharts, or diagrams, provide a more detailed summary in an accompanying text document

Colors and Contrast

- Avoid using only color to convey meaning; instead, use text size, weight, formatting, etc.
- Avoid certain color combinations, such as green, red, and black
- Use a color contrast checker to ensure text meets accessibility standards for readability

Tables

- Avoid splitting or merging cells
- Avoid blank cells
- Use headers for rows/columns
- Provide a caption
